4-yr. Transplants (2-2) 5-8 in.	60.00

## TRANSPLANTING INFORMATION

The figures 2-1, 2-2, shown above, represent the number of years the trees have been in seed beds, number of years in transplant beds, and the number of times transplanted. The first figure indicates the number of years the trees remained in the seed bed before being transplanted. The second figure indicates the number of years the trees remained in the transplant bed. The total of the figures indicates the age of the tree, and each dash represents one transplanting. The total of the figures add up to the age of the tree. Thus, a 2-2 Balsam Fir is a 4-year old tree which remained in the seed bed two years, was transplanted, and remained in the transplant bed two years.

## SHIPPING WEIGHTS

The following shipping weights are approximate due to the different varieties. Weight per thousand trees, including packing material and crates, will average as follows: 2-year seedlings, 7 lbs.; 3-year seedlings, 15 lbs.; 3-year transplants, 28 lbs.; 4-year transplants, 80 lbs.; 5-year transplants, 200 lbs.; 6-year transplants, 200-300 lbs. All trees shipped by express unless otherwise specified. Trees shipped by freight are not covered by our Guarantee.

Mugho Pine

## Guarantee...

We guarantee that 90% of the Transplants that you buy from this Price List will live. If you will notify us before October 1, 1953, of the number over 10% which do not live, replacement will be made to equal 90% of the number originally purchased. If we are unable to furnish replacements in the exact size originally purchased, we will furnish them in the nearest size and variety. Shipments will be made by express collect. Trees shipped by freight or truck cannot be guaranteed.

Harry Eastman

## FALL PLANTING

Fall is an ideal time to plant your Maine Evergreens because then each tree has a chance to get its roots down and anchored for fast, strong growth early the following Spring. We begin to ship our trees from Fryeburg soon after September 1st and continue right up to the middle of November. CAUTION: We do not recommend the planting of forest trees on wet loam, or clay soil in the Fall, as the effect of frost on this soil will throw the trees out of the ground. However, Fall planting on light, well-drained, or sandy soil is very satisfactory.

Living Tree Time - 1952

PLANT THIS FALL FOR  
TREE-MENDOUS PROFIT

Dear Friend and Tree Grower:

Multiply your Tree Growing Profits this coming year and in years to come...by planting GUARANTEED-TO-LIVE TREES this fall.

As an experienced Tree Grower you know the advantages of early fall planting...to establish strong roots - thus resulting in fast, strong growth during the spring...and QUICKER SPRING PROFITS FOR YOU!

Please read our enclosed Fall Wholesale Price List NOW...comprising top quality, sturdy-rooted Trees - exceptionally low in price...and backed by a GUARANTEE - "Transplanted Trees Must Live or Replacement FREE!"

Yes, the Trees you purchase from Western Maine must Live! In every case, by growing Western Maine Trees, you can provide your customers with the finest, hardiest evergreens - at lowest market prices!

And our Trees have profitably proven themselves year after year... to thousands of satisfied buyers throughout the United States - because Tree growing in our Fryeburg nurseries is a SCIENCE - not a hobby! Each and every Tree you receive is given utmost care by experienced tree growers - from seedling to the time your Trees are on their way to you. Only after years of systematic testing and experience can you be assured of obtaining transplanted Trees GUARANTEED-TO-LIVE!

But that's not all! Maine winters as you know, are bitter cold - and summers are hot. Through these two extreme seasons, our Trees have become accustomed to the most rigid weather conditions - your further assurance of receiving healthy, hardy Trees - Trees which will grow quickly and sturdily in any climate...in any soil. That is why we are able to satisfy buyers, such as yourself, with MILLIONS OF HEALTHY, HARDY TREES - at LOWEST WHOLESALE PRICES!

IMPORTANT: Please let me remind you again - don't overlook this FALL PROFIT OPPORTUNITY! Fall planting results in early spring growth... and quicker profits for you. You can be certain of receiving the Trees you want by sending me your ORDER NOW. The response to our value-priced hardy Trees is so great each year, we regretfully find ourselves sold out on some varieties, and often, are unable to fill late orders.

So be sure of getting the TREES YOU WANT - at PRICES YOU WANT TO PAY. Choose from the many varieties in your enclosed Wholesale Price Folder - and get a head start next spring. Remember! Spring prices may be higher...ORDER TODAY... PROFIT TOMORROW.

Ship By: Express ☐ Parcel Post ☐

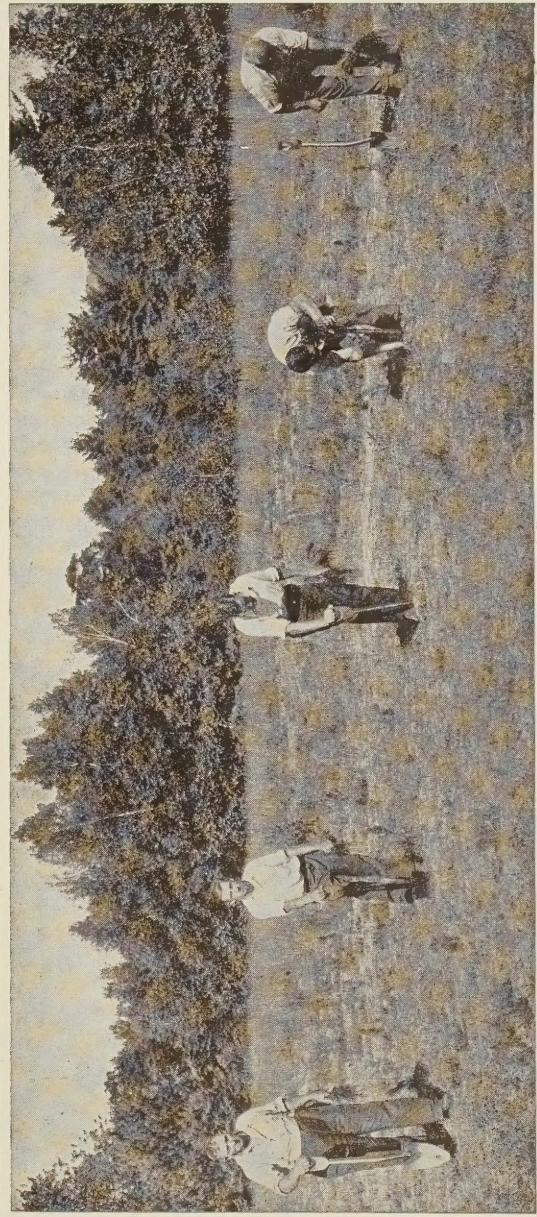

Special Offers will not be broken. No order for less than five trees. No order for less than \$1.00. Orders will be shipped C. O. D. providing a payment of half the amount accompanies the order. Fifty trees of the same kind and size may be bought at the 100 rate. All prices except special prepaid offers are F. O. B., Fryeburg, Maine. PERM 49

*This photo shows a section of our Nursery No. 2. The trees in the fore ground are 3-year Black Hill Spruce transplants. The bed of larger transplants at upper left are 5-year old, twice transplanted trees. The mountains in the background are part of the White Mountains.*

**Proper planting technique:** First man with trees in left hand and shovel in right is ready to make the hole. Second man is inserting shovel straight into the ground. Third man has inserted shovel and has the handle pushed ahead, forming opening for tree back of shovel. Fourth man, while keeping shovel pushed ahead with his foot, has taken one tree from the bundle carried in his left hand and is putting it in hole. Fifth man has removed shovel and is closing opening by stamping each side with his heel. On cleared land such as shown here, one trained man can easily plant 1000 trees day.

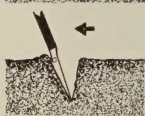

# Plant CHRISTMAS TREES For Extra Profits

There are very few investments involving the use of land which are as safe and productive as a Christmas Tree plantation. You can easily have an extra income ranging from several hundred to several thousands of dollars each Christmastime with little work on your part. On as little as one acre of land you can grow from 3000 to 4000 trees. In as little as four or five years after you plant you can begin to harvest a CASH CROP of Christmas Trees! Your cost is but pennies a tree and your gross profit will run better than 500% over your cost price. With more than 30 million Christmas Trees sold each year at an average wholesale price of \$1.00 a tree, you can count on a good, steady demand. And one of the most attractive features of planting them is that they can be grown on waste or marginal land. Write today for FREE Christmas Tree Bulletin that tells more about this profitable enterprise.

## Plant 1000 Trees a Day With This Spade Only \$6.75

This is the specially designed, rugged planting tool we use at our Nursery. Any able man can plant 1000 trees a day with it.

The illustrations at left show the proper planting technique. Insert spade straight into the ground. Pull handle back and push forward to form opening for tree back of spade. Spread out the roots. Close the opening by stamping the soil with heel.

Tool shipped express collect, unless otherwise specified.
